BILLING REPORT — OCTOBER 2026

Billing dashboard

October 2026 — every GCP, AWS and Vonage cost in one place: the summary table, then a card per source with its full list. GCP uses US/Pacific month boundaries to match the Billing console and invoice; AWS and Vonage use Europe/London dates.

Data timestamp: queries run 2026-11-10 11:00 GMT. Latest data in each source — GCP billing export: 2026-11-01 17:56 UTC (invoice month 2026-10); AWS CUR: usage to 2026-10-31; Vonage: usage to 2026-10-31. Report period: 1–31 October 2026.

SOURCE	COST
GCP Invoice (Google)	**$40,111.83**
GCP Marketplace (invoiced separately)	**$1,928.03**
GCP All services (after credits)	**$41,979.88**
↳ GCP UK Platform COGS	$13,482.81
↳ GCP UK API COGS	$1,552.38
↳ GCP UK R&D Platform COGS	$5,784.45
↳ GCP UK R&D API COGS	$0.27
↳ GCP US Platform COGS	$2,101.67
AWS Marketplace (third-party, billed via AWS)	**$7,950.13**
AWS All services (excluding Marketplace, inc VAT)	**$4,192.63**
↳ AWS Development (inc VAT)	$2,497.80
↳ AWS Production (inc VAT)	$1,694.84
Vonage All categories	**€6,993.25**
↳ Vonage SMS	€3,302.08
↳ Vonage Inbound Calls	€213.64
↳ Vonage Outbound Calls	€2,260.78
↳ Vonage WebSocket	€1,216.75
↳ Vonage Other	€0.00

GCP Invoice (Google) reproduces Google's monthly invoice to the cent: invoice month 2026-10, seller Google, list cost $42,377.35 less $2,265.52 of credits. **GCP Marketplace** is third-party sellers billed through the same account but invoiced separately. The rows below them group by *when usage happened*, so they don't match the invoice exactly — see the first card for the reconciliation.

What "Cost" means per row. GCP All services is *after* credits (list cost $44,236.44 less $2,256.56 of credits). The five GCP COGS rows are *cost before credits* — the basis COGS is reported on, and the figure the GCP Billing console shows. AWS is UnblendedCost *including VAT*, matching the AWS console; AWS Marketplace — third-party products such as the Claude and OpenAI "Amazon Bedrock Edition" models — is shown on its own row, the same way as GCP Marketplace. Vonage is the summed price in **EUR**.

Indented rows mean two different things. Under AWS excluding Marketplace, inc VAT ($2,497.80 + $1,694.84 = $4,192.63) and Vonage (€3,302.08 + €213.64 + €2,260.78 + €1,216.75 + €0.00 = €6,993.25) they *add up exactly* to the row above. Under GCP All services they *don't*: they're slices of GCP spend on different project scopes. The COGS rows are grouped UK first (production, then R&D/dev), then US production, so they never sum to All services or to each other. No grand total is shown, since it would mix currencies and double-count.

Service-ID coverage this month: UK Platform COGS 23 of 24 matched (no usage: `82AF–DE7A–51D0`); US Platform COGS 18 of 24 matched (no usage: `82AF–DE7A–51D0`, `D64E–AF12–1813`, `D870–408D–92A6`, `DC5D–D207–FD2F`, `F17B–412E–CB64`, `FA26–5236–B8B5`); UK R&D Platform COGS all 24 matched. UK R&D API COGS is small dev usage, not zero.

GCP — October 2026 invoice

bigquery-sql/gcp_invoice.sql · invoice month 2026-10 · USD

By seller

INVOICE	SELLER	COST	CREDITS	TOTAL
Google invoice	Google	$42,377.35	−$2,265.52	$40,111.83
Marketplace (invoiced separately)	84codes AB	$1,365.24	$0.00	$1,365.24
Marketplace (invoiced separately)	Anthropic	$313.36	$0.00	$313.36
Marketplace (invoiced separately)	Elasticsearch B.V.	$249.43	$0.00	$249.43
Unattributed (rounding)	-	−$0.01	$0.00	−$0.01

Reconciliation with GCP All services

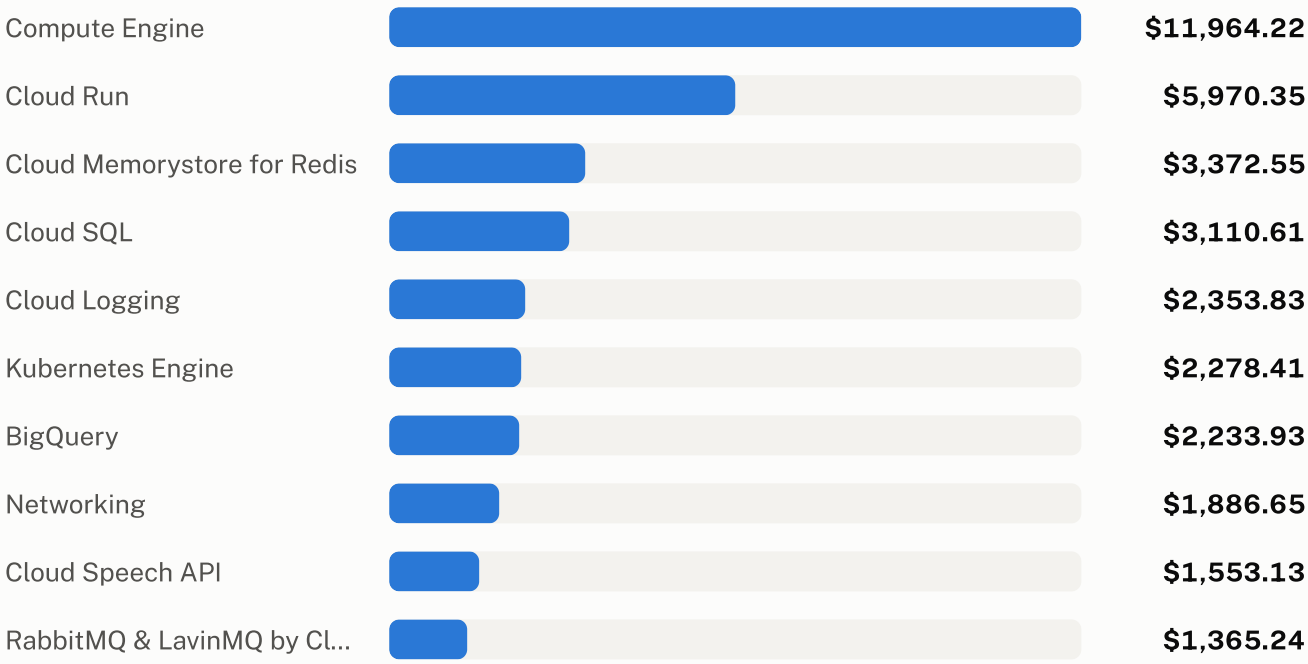

STEP	USD
GCP All services — October usage dates, after credits	$41,979.88
+ usage reported late and billed on this invoice (net)	$59.97
= everything on invoice month 2026-10	$42,039.85
− 84codes AB (Marketplace)	−$1,365.24
− Anthropic (Marketplace)	−$313.36
− Elasticsearch B.V. (Marketplace)	−$249.43
− unattributed rounding	$0.01
= GCP Invoice (Google)	**$40,111.83**

The invoice groups by invoice month and includes late-reported usage; the usage rows group by usage date. Marketplace sellers bill through the GCP account but issue their own invoices.

AWS Marketplace — 14 products

PRODUCT	ENVIRONMENT	COST
Aikido Security	Production	$7,711.20
Claude Opus 5.5 (Amazon Bedrock Edition)	Development	$79.48
Claude Opus 4.6 (Amazon Bedrock Edition)	Development	$66.67
Claude Sonnet 4.6 (Amazon Bedrock Edition)	Development	$41.49
Claude Haiku 4.5 (Amazon Bedrock Edition)	Development	$29.98
Claude Sonnet 5 (Amazon Bedrock Edition)	Development	$10.91
Claude Sonnet 4.5 (Amazon Bedrock Edition)	Development	$7.05
Claude Opus 4.8 (Amazon Bedrock Edition)	Development	$1.37
OpenAI GPT-6 Astra (Amazon Bedrock Edition)	Development	$1.10
OpenAI GPT-5.4 (Amazon Bedrock Edition)	Development	$0.73
Claude Haiku 5.5 (Amazon Bedrock Edition)	Development	$0.14
Cohere Embed 3 Model - English (Amazon Bedrock Edition)	Development	$0.01
OpenAI GPT-5.5 (Amazon Bedrock Edition)	Development	$0.00
Cohere Embed 3 Model - English (Amazon Bedrock Edition)	Production	$0.00
Total Marketplace		**$7,950.13**

Marketplace products are identified by their product code (a Marketplace product ID rather than an AWS service code) and excluded from the AWS rows. Line items are rounded individually, so a list can differ from its total by a cent. UnblendedCost including VAT (20% on AWS services; none on Marketplace products), matching the AWS console. No RI/Savings Plan/discount breakdown yet. Production/Development is an AWS Cost Category, not separate AWS accounts.

Vonage — by category

vonage_services.sql · October 2026 · Europe/London dates · **EUR**

Full breakdown — category, product, direction

CATEGORY	PRODUCT	DIRECTION	RECORDS	COST
SMS	SMS	outbound	68,248	€3,301.94
SMS	SMS	inbound	26	€0.14
Inbound Calls	VOICE-CALL	inbound	6,965	€213.64
Outbound Calls	VOICE-CALL	outbound	16,490	€2,260.78

CATEGORY	PRODUCT	DIRECTION	RECORDS	COST
WebSocket	WEBSOCKET-CALL	—	92,879	€1,216.75
Other	VOICE-TTS	—	1	€0.00
All categories			**184,609**	**€6,993.25**

Currency is EUR, not USD. Vonage's API leaves the `currency` field blank on SMS rows (68,274 of 184,609 this month); the total assumes EUR like every other category. The five categories cover every record — nothing is unallocated. "Other" (VOICE-TTS) near €0 is expected.

Generated by the `billing-dashboard` skill for October 2026, with each query's window pinned to the month (GCP 2026-10-01 to 2026-11-01 US/Pacific; GCP invoice month 2026-10; AWS and Vonage 2026-10-01 to 2026-10-31). GCP from `bq_dataset_billing_ufonia_invoice`; AWS from `bg_dataset_aws_cost_and_usage` (`aws-bigquery-loader`); Vonage from `bq_dataset_vonage_cost_and_usage` (`vonage-bigquery-loader`). GCP's export can still pick up small late adjustments for a few days after month end.
